Love, Cold Weather, and Fish?

Creating Valentine's for our parents, making creative bags for our treats, and making fish out of hearts filled our Valentine celebration time. The snow and sickness kept us away from school a little, but we wrote another class book about Goldilocks and the Three Bears.

The Rainbows are creating an alphabet book, learning about the shapes of the letters and decorating them with all kinds of materials. The Little Lambs will talk about the alphabet in class as well. We are learning to listen for the first sound in a word and stretch a word to find all the sounds.

Dr. Seuss will be our next author study as we approach his birthday in March. We have started reading some of his fun books and will make a great project for creativity.

Volunteer Opportunity

We could use someone to fix our puppet theatre. A little wood glue and bolts would fix it right up. If you are interested, it is in the hallway by the classroom.

Miracles!

Jesus can do anything! We have learned about a great catch of fish and how Jesus can feed lots of people with just a small lunch. You will see our miracles review soon in church if you haven't already. We have finished our study of the Lord's Prayer and will start learning about Zacchaeus before we begin our Easter study. Look for us to join you on the big screen again soon!

Field Trips and Family Night

A grocery store in the classroom has been a great deal of fun, allowing us to shop for all kinds of items. We visited our local grocery store and had a great time seeing the back of the store. Thank you Bill Norden! We are learning about the five food groups and enjoyed creating a menu for our parents. In writing this we are planning to serve that meal to our families on Friday, Feb. 26! Family night, here we come!
